Exploratory Data Analysis

Table 1: Distribution of All Claims by Location

location	count	prop
Advertisement	188	0.075
Debate	225	0.090
Interview	208	0.083
Public Event	101	0.040
Social Media	405	0.162
Speech/Remarks	620	0.248
TV Appearance	472	0.189
Written Statement	281	0.112

The three largest categories of claims, in the PolitiFact database, are **Speech/Remarks**, **TV Appearance**, and **Social Media**. The smallest categories were **Public Event**, **Advertisement**, and **Interview**.

Table 2: Proportion of Ratings by Location

Written Statement	0.149	0.214	0.231	0.185	0.192	0.028

The highest proportion of True-ish (True, Mostly True, Half True) claims are made in debates (0.604). The lowest proportion of True-ish claims are made in Advertisements (0.442). The highest proportion of Pants on Fire claims appear in interviews (8.7% of claims checked). The highest proportion of True statements are made at Public Events (18.8% of claims checked).

Table 3: Claims Count by Party

claimant_party	count	prop
Democratic	1304	0.522
Republican	1196	0.478

As we know, there are approximately 100 more claims made by Democrats versus Republicans. Given the overall size of the dataset, though, I can say they are about equivalent, as Democrats have 1.09x as many claims as Republicans.

Seeing that the vast majority of claims originate on Twitter and Facebook, lets center in on those.

Table 6: Proportion of Ratings by Platform

platform	TRUE	Mostly True	Half True	Mostly False	FALSE	Pants on Fire
Facebook	0.129	0.161	0.210	0.210	0.210	0.081
Twitter	0.163	0.228	0.211	0.175	0.181	0.042

This data appears to indicate that Facebook has a higher proportion of falsehoods than Twitter, among all checked statements on PolitiFact. Of all statements on Facebook, 50.1% of statements were found to be Mostly False, False, or Pants on Fire, compared to 39.8% of the same on Twitter. Twitter also had a higher proportion of True statements checked, 16.3% to Facebook's 12.9%, about 1.26x higher. There are 2x as many Pants on Fire claims on Facebook when compared to Twitter.

TV Appearance

To continue analytics, we will focus on all TV channels on which at least 50 claims made. This leaves: CNN, FOX, MSNBC, NBC, and the Regional Station tag.

Table 8: Claim Rating Proportions by TV Channel

channel	TRUE	Mostly True	Half True	Mostly False	FALSE	Pants on Fire
CNN	0.072	0.203	0.290	0.188	0.188	0.058
FOX	0.043	0.163	0.174	0.152	0.283	0.185

Regional Station	0.151	0.247	0.164	0.301	0.123	0.014

Basing trueness on Half True, Mostly True, and True statements, the descending order of trueness by TV Channel goes as follows: MSNBC (61.6% True-ish), CNN (56.5% True-ish), Regional Stations (56.2% True-ish), NBC (45.2% True-ish), and finally FOX (38.0% True-ish).

FOX also had significantly less True statements recorded, and significantly more Pants on Fire claims. Compared to the next most extreme value, FOX had 0.63x as many True statements as NBC, and 3.19x as many Pants on Fire statements as CNN. Compared to Regional Stations, which has the lowest proportion of Pants on Fire claims, FOX news has 13.2x as many Pants on Fire claims.

Among the major national news channels, CNN, MSNBC, and NBC had nearly identical proportions of Pants on Fire claims, 0.58, 0.050, and 0.055 respectively.

Some interesting trends to note among the checked claims:

- Virtually no True statements made by Republicans on CNN
- Highest proportion of Pants on Fire claims made by Democrats on FOX (25.0% of Democratic claims checked on FOX)
- About equal proportion of False-ish statements on MSNBC (38.1% for Democrats, 38.9% for Republicans)
- Republicans appear to lie most on NBC, with 68.9% of claims checked as False-ish
- NBC also has the largest difference between True-ish statements by party, 67.9% Democratic claims were checked as True-ish whereas only 31.0% of Republican claims were checked as True-ish. This is a 36.9% difference.
- Virtually no Pants on Fire statements made by Republicans on Regional Stations

In our data, it appears that Democrats had a higher proportion of claims checked from Campaign events, 39.2%, than Republicans 24.4%. Conversely, Republicans had more checked statements at Press Events than Democrats, 28.7% versus 15.5%. Both had a very minimal amount of statements checked in Hearings, though Republicans had nearly 2x more claims, 7.8% of their total claims when compared to 4.1%.

An unspecified debate is something like: a roundtable discussion, debates between politicians and a news anchor, or legislative debates.

An election debate is a debate between two candidates actively engaged in campaigns against each other.

'summarise()' has grouped output by 'location.extra'. You can override using the '.groups' argument.
